

Wikov has a long engineering, manufacturing and service tradition of gearboxes and gears for variety of industrial applications under ČKD and ŠKODA brands which transformed into Wikov brand in 2004. It is our primary effort to provide for professional service that will cut downtimes to minimum and increase efficiency of your operation.

Our success is based on experience we gained in our 130 years history, international team of R&D specialists and state of the art production technologies. These main pillars lead to identifying the best solution for you with maximizing functional and economical parameters of your application.

The Essence of Engineering

OEM service for long life of your drive solution

Installation and Commissioning

by our service engineers for new, refurbished or upgraded gearbox from unpacking to start-up testing

Operator Training

focused on troubleshooting, maintenance and minor repairs throughout the lifetime of the product

Onsite Repairs and Inspections

from visual inspection to successful repair during warranty period or afterwards

Preventative Maintenance

tailored to the specific needs in a maintenance program to ensure for longer life and stable performance of your gearbox

Diagnostics

Onsite

condition analyses of your gearbox or its performance by our service team by means of specialized diagnostic tools and spectral analysis for evaluation of the gearbox condition without need of disassembly.

Remote

condition monitoring of your gearbox via WiGuard online diagnostic tool with real time evaluation to prevent extensive wear or damages

Factory Overhauls and Upgrades

Own facility to refurbish or upgrade your existing gearbox no matter what brand. Reverse engineering capability to manufacture gear unit to fit your specific needs.

Spare Parts

Precisely manufactured parts represent guarantee of smooth operation and long life of your gearbox. Wikov as a successor of ČKD and ŠKODA brands in the field of gears and gearboxes offers OEM parts supplies for gearboxes of those brands. Along with this tradition Wikov is a qualified supplier of economically manufactured spare parts for other brand gearboxes.

Temperature measurement

Vibration measurement

Oil quality measurement

Wikov – The Essence of Engineering

Comprehensive service from one source

Flexibility and short delivery time due to own manufacturing facility

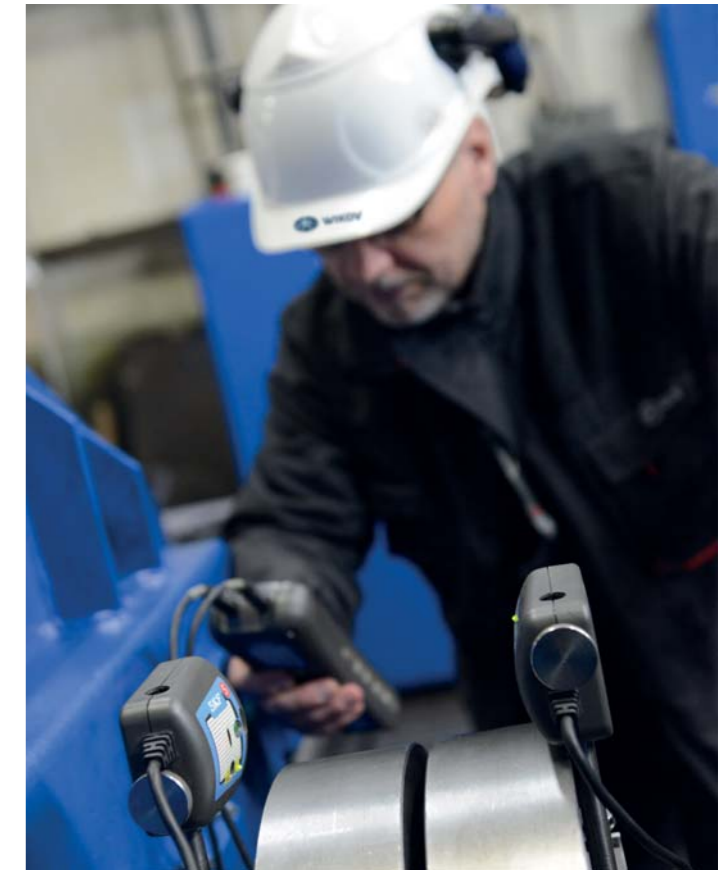

Genuine spare parts for ŠKODA, ČKD and Wikov brands

Full line of quality gear components totally interchangeable with OEM

Tailored maintenance program for your business

Sophisticated measuring methods and tools

WiGuard remote condition monitoring system

Coaxial shaft alignment

Vertical mill gearbox after refurbishment and upgrade

Mobile 3-D measurement of gearbox dimensions

Global service network
